

The Specification

Please replace the paragraph on page 16, lines 13-17 with the following paragraph:

Initially, energy distribution calculator 238 236 determines the energy distribution of the portion of signal 214 in the 4kHz and 8kHz bands (act 240) and speech to class VQ distance calculator 230 determines the distance from the input GM (corresponding to the portion of signal 214 being classified) and the closest trained GM (act 242).
